ATHLETIC CAMPUS - PRIMARY CONCERNS
 1. Lack of available and usable athletic fields based on athletic programming requirements and needs. Currently there is a significant conflict with the ability to schedule games and practice activities based on the amount of fields and the condition of the available fields. At present there are no dedicated lacrosse fields.

2. Accessible restrooms and drinking fountains some varsity fields as well as freshman facilities and practice fields are lacking throughout the athletic campus. The lack of available drinking fountains and restroom facilities hampers adequate programming time.

3. Current athletic schedules have resulted in the over use of all practice and freshman facilities. In addition to resolving additional field areas, turf management and field improvement programs should be implemented within these areas.

4. The athletic campus contains over 26 facilities for three high schools. It is a task for parents and spectators to locate a specific facility. A wayfinding system with appropriate signage, maps and landmarks should be implemented.

5. Physical and visual improvements to the varsity stadium and related support facilities should be made. The varsity stadium is the primary venue for the athletic campus and as such should reflect that status. ①
